Index to volume 27 (1989)

No 1 (January) pp 1–64

No 2 (March) pp 65–128

No 3 (May) pp 129–192

No 4 (July) pp 193–256

No 5 (September) pp 257–320

No 6 (November) pp 321–384

Articles

Acoustic attenuation measurements using parametric arrays
Guigné, J. Y., Chin, V. H. and Solomon, S. M. 297

Acoustic emission investigations of the horizontal transport belts used in mining, subjected to uniaxial stresses
Witos, F., Opilski, A. and Lutynski, A. 182

Acoustical measurements in solids under very high pressure
Bonello, B., Fischer, M. and Zarembowitch, A. 343

Amplitude spectrum method for the measurement of phase velocity
Pialucha, T., Guyott, C. C. H. and Cawley, P. 270

Comparison of some non-adaptive deconvolution techniques for resolution enhancement of ultrasonic data
Hayward, G. and Lewis, J. E. 155

Confirmation of the protective effect of cysteamine *in vitro* ultrasound exposures
Inoue, M., Church, C. C., Brayman, A., Miller, M. W. and Malcuit, M. S. .. 362

Correlation method for normal mode tracking in anisotropic media using an ultrasonic immersion system
Castagnede, B., Roux, J. and Hosten, B. 280

Curved ultrasonic array transducer for AGV applications
Huissoon, J. P. and Moziar, D. M. 221

Design considerations for strain gauge radiation force detectors
Chivers, R. C., Som, J. N., Anson, L. W. and Ogulu, A. 302

Detection of smooth bondings of polymer coatings by ultrasonic spectroscopy
Tsukahara, Y. and Ohira, K. 3

Diffraction correction in backscattering measurement
Xin-long, Wang and Ruo, Feng 239

Effects of viscosity and chemical relaxation on acoustic pulse propagation in seawater
Leander, J. L. 374

Extended computer method for predicting the transient response of ultrasonic NDT probes
Collie, D. A. L. and Player, M. A. .. 141

Generation of short acoustic pulses from an energetic picosecond laser
Dewhurst, R. J. and Al'Rubai, W. S. A. R. 262

High speed ultrasonic linear motor with high transmission efficiency
Kurosawa, M. and Ueha, S. 39

High-speed photography of transient excitation
Leighton, T. G., Walton, A. J. and Field, J. E. 370

Influence of ultrasonic vibrations on the retained austenite content of a quenched 1% carbon and 2.3% manganese steel sample
Iyer, K. J. L. 245

Laser generation of narrow-band and directed ultrasound
McKie, A. D. W., Wagner, J. W., Spicer, J. B. and Penney, C. M. 323

Liquid-thermoviscoelastic solids interface
Deschamps, M. and Cheng, C. 308

Low power ultrasonic imaging using digital correlation
Hayward, G. and Gorfu, Y. 288

Measurement of sound velocity in liquid using the acoustic material signature
Guillon, F. 26

Measurement of the effective velocity amplitude of a weakly focussed bowl ultrasonic transducer
Adach, J. and Chivers, R. C. 178

Medical ultrasound imager based on time delay spectrometry
Heyser, R. C., Hestenes, J. D., Rooney, J. A., Gammell, P. M. and Le Croissette, D. H. 31

Model for the ultrasonic inspection of rough defects
Ogilvy, J. A. 69

New ultrasonic array structure for fixed condition monitoring in solid media
Hayward, G., McNab, A. and Cochran, A. 210

On the problem of coupling of ultrasonic receivers to layered structures for process control
Anson, L. W. and Chivers, R. C. ... 331

Optical probing of ultrasonic pulses
Wolf, J., Neighbors III, T. H. and Mayer, W. G. 150

Precision laser-ultrasonic velocity measurement and elastic constant determination
Aussel, J.-D. and Monchalin, J.-P. 165

Preparation of colloidal semiconductor solutions of MoS_2 and WSe_2 via sonication
Gutiérrez, M. and Henglein, A. 259

Pulsed calibration technique of miniature ultrasonic receivers using a wideband laser interferometer
Djelouah, H., Baboux, J. C. and Perdrix, M. 80

Reference liquid for ultrasonic attenuation
Zeqiri, B. 314

Response of a longitudinal transducer to a longitudinal or shear wave under oblique incidence
Jayet, Y., Baboux, J. C., Lethiecq, M. and Perdrix, M. 91

Some acoustical properties of certain polyurethane elastomers
Warnes, L. A. A. 97

Some applications of laser ultrasound
Scruby, C. B. 195

Spectral analysis of randomly distributed scatterers for ultrasonic grain size estimation
Bilgutay, N. M., Li, X. and Saniie, J. 19

Spectral characteristics of acoustic cavitation
Ilyichev, V. I., Koretz, V. L. and Melnikov, N. P. 357

Study of internal pressure and free volume of urea solutions in water—dimethyl sulphoxide mixtures from ultrasonic velocity
Pillai, S. O., Murugesan, V. and Natarajan, S. 54

Theoretical evaluation of ultrasonic velocity in binary liquid mixtures
Agnihotri, P. K. and Adgaonkar, C. S. 248

Transducer defect studies using light diffraction tomography
Nøhr Larsen, P. and Bjørnø, L. 86

Transient excitation of insonated bubbles
Leighton, T. G. 50

Ultrasonic gas flow meter with corrections for large dynamic metering range
Delsing, J. 349

Ultrasonic investigation of contact between solids under high hydrostatic pressure
Królikowski, J., Szczepek, J. and Witczak, Z. 45

Ultrasonic non-destructive measurements of cortical bone thickness in human cadaver femur
Singh, S. 107

Ultrasonic scattering by spherical voids
Zhang, H. and Bond, L. J. 116

Ultrasonic studies of gall-bladder stones
Singh, V. R. and Agarwal, R. 114

Ultrasonic studies of the hydration of non-electrolytes
Juszkiewicz, A. 131

Ultrasonic system for imaging delaminations in composite materials
Lloyd, P. A. 8

Utility of subsurface longitudinal waves in composite material characterization
Pilarski, A. and Rose, J. L. 226

Waveguides in medical ultrasonics: an experimental study of mode propagation
Nicholson, N. C., McDicken, W. N. and Anderson, T. 101

Wide bandwidth, constant beamwidth acoustic projectors: a simplified design procedure
Gough, P. T. and Knight, J. S. 234

Keywords

Absorption spectra
sonication, colloidal semiconductor solutions 259

Acoustic attenuation
models, parametric arrays 297

Acoustic cavitation
bubble pulsations, noise radiation . 357

Acoustic emission
uniaxial stresses, conveyor belts ... 182

Acoustic impedance
gallstones, ultrasonic attenuation .. 114

Acoustic microscopy
sound velocity, non-linearity in liquids 26

Acoustic projectors
transducers, design procedures 234

Acoustic pulse propagation
seawater, distortion..... 374
Acoustic velocity
laser ultrasonics, elastic constants. 165
Acoustic windows
transducers, polyurethane elastomers 97
Acousto-optic methods
optical probing, transducer characterization 150
Backscattering
biological tissues, diffraction correction 239
Binary liquid mixtures
ultrasonic velocity, models..... 248
Biological tissues
backscattering, diffraction correction 239
Bone thickness
NDE, computed tomographs..... 107
Brillouin scattering
ultrasound velocities, high pressure 343
Bubble dynamics
sonoluminescence, cavitation 50
Bubble pulsations
acoustic cavitation, noise radiation 357
Bubbles
cavitation, sonoluminescence 370
Calibration
laser ultrasonics, defect detection.. 195
Cavitation
sonoluminescence, bubble dynamics 50
bubbles, sonoluminescence 370
Colloidal semiconductor solutions
sonication, absorption spectra 259
Composite materials
imaging techniques, NDT..... 8
Composite materials characterization
subsurface wave propagation, elastic constants 226
Computed tomographs
NDE, bone thickness..... 107
Contact interface of solids
NDE, reflection coefficient..... 45
Contact testing
ultrasonic array, ultrasonic imaging 210
Conveyor belts
acoustic emission, uniaxial stresses 182
Coupling
process control, transducers..... 331
Cysteamine
In vitro ultrasound, protective effects 362
Deconvolution
signal processing, inverse filtering 155
Defect detection
laser ultrasonics, calibration 195
light diffraction tomography, transducers 86
Design parameters
numerical models, force detectors 302
transducers, performance characteristics 221
Design procedures
acoustic projectors, transducers.... 234
Diffraction correction
biological tissues, backscattering .. 239
Digital correlation
Ultrasonic imaging, image processing... 288
Directed ultrasound
laser ultrasound, narrow-band ultrasound 323
Distortion
acoustic pulse propagation, seawater 374
Elastic constants
laser ultrasonics, acoustic velocity 165
materials characterization, models 280
subsurface wave propagation, composite materials characterization 226
Force detectors
Design parameters, numerical models 302
Free volume
ultrasonic velocities, internal pressure 54
Gallstones
ultrasonic attenuation, acoustic impedance 114
Heterogeneous waves
wave propagation, thermoviscoelastic solids..... 308
High pressure
ultrasound velocities, Brillouin scattering 343
Hydration numbers
ultrasound velocities, non-electrolytes 131
Hydrophones
laser interferometry, lasers 80
transducers, ultrasound velocities.. 178
Image processing
ultrasonic imaging, digital correlation 288
Imaging techniques
composite materials, NDT 9
time delay spectrometry, medical ultrasound 31
In vitro ultrasound
protective effects, cysteamine 362
Internal pressure
ultrasonic velocities, free volume 54
Inverse filtering
signal processing, deconvolution .. 155
Laser interferometry
hydrophones, lasers 80
Laser ultrasonics
acoustic velocity, elastic constants 165
defect detection, calibration 195
Laser ultrasound
narrow-band ultrasound, directed ultrasound 323
photoacoustics, PVDF detection... 262
Lasers
hydrophones, laser interferometry.... 80
Light diffraction tomography
transducers, defect detection..... 86
Longitudinal transducers
ultrasonic waves, numerical models 91
Material characterization
steel, ultrasonic treatment..... 245
Materials characterization
elastic constants, models 280
phase velocity, ultrasonic resonances 270
Mathematical correction
sing-around gas flow meter, trigger errors 349
Medical ultrasound
time delay spectrometry, imaging techniques..... 31
Models
acoustic attenuation, parametric arrays 297
elastic constants, materials characterization 280
NDT, surface roughness 69
ultrasonic velocity, binary liquid mixtures 248
Narrow-band ultrasound
laser ultrasound, directed ultrasound 323
NDE
computed tomographs, bone thickness 107
reflection coefficient, contact interface of solids..... 45
NDT
composite materials, imaging techniques 8
surface roughness, models..... 69
NDT probes
transducers, transfer functions 141
Noise radiation
acoustic cavitation, bubble pulsations 357
Non-electrolytes
ultrasound velocities, hydration numbers 131
Non-linearity in liquids
acoustic microscopy, sound velocity 26
Numerical models
design parameters, force detectors. 302
longitudinal transducers, ultrasonic waves 91
wave scattering, spherical voids ... 116
Optical probing
transducer characterization, acousto-optic methods..... 150
Parametric arrays
acoustic attenuation, models..... 297
Performance characteristics
transducers, design parameters..... 221
Phase velocity
materials characterization, ultrasonic resonances..... 270
Photoacoustics
laser ultrasound, PVDF detection.. 262
Polyurethane elastomers
transducers, acoustic windows..... 97
Process control
coupling, transducers..... 331
Protective effects
in vitro ultrasound, cysteamine..... 362
PVDF detection
photoacoustics, laser ultrasound... 262
Random scatterer model
spectral analysis, ultrasonic grain size estimation..... 19
Reference material
ultrasonic attenuation, silicone fluid 314
Reflection coefficient
bonding quality, ultrasonic spectroscopy 3
NDE, contact interface of solids 45
Seawater
acoustic pulse propagation, distortion 374
Signal processing
inverse filtering, deconvolution 155
Silicone fluid
ultrasonic attenuation, reference material 314
Sing-around gas flow meter
mathematical correction, trigger errors 349
Sonication
colloidal semiconductor solutions, absorption spectra..... 259
Sonoluminescence
cavitation, bubble dynamics..... 50
cavitation, bubbles..... 370
Sound velocity
acoustic microscopy, non-linearity in liquids..... 26
Spectral analysis
random scatterer model, ultrasonic grain size estimation 19
Spherical voids
wave-scattering, numerical models 116
Steel
material characterization, ultrasonic treatment..... 245
Subsurface wave propagation

elastic constants, composite materials characterization 226
Surface roughness
NDT, models 69
Thermoviscoelastic solids
wave propagation, heterogeneous waves 308
Time delay spectrometry
medical ultrasound, imaging techniques 31
Tissue biopsy
waveguides, ultrasound propagation 101
Transducer characterization
optical probing, acousto-optic methods 150
Transducers
acoustic projectors, design procedures 234
acoustic windows, polyurethane elastomers 97
design parameters, performance characteristics 221
coupling, process control 331
light diffraction tomography, defect detection 86
NDT probes, transfer functions 141
ultrasound velocities, hydrophones .. 178
Transfer functions
NDT probes, transducers 141
Travelling waves
ultrasonic linear motors, vibration systems 39
Trigger errors
sing-around gas flow meter, mathematical correction 349
Ultrasonic array
contact testing, ultrasonic imaging 210
Ultrasonic attenuation
gallstones, acoustic impedance 114
silicone fluid, reference material 314
Ultrasonic grain size estimation
spectral analysis, random scatterer model 19
Ultrasonic imaging
image processing, digital correlation 288
ultrasonic array, contact testing 210
Ultrasonic linear motors
travelling waves, vibration systems .. 39
Ultrasonic resonances
materials characterization, phase velocity 270
Ultrasonic spectroscopy
bonding quality, reflection coefficient 3
Ultrasonic treatment
material characterization, steel 245
Ultrasonic velocities
free volume, internal pressure 54
models, binary liquid mixtures 248
Ultrasonic waves
longitudinal transducers, numerical models 91
Ultrasound propagation
waveguides, tissue biopsy 101
Ultrasound velocities
Brillouin scattering, high pressure 343
hydration numbers, non-electrolytes 131
transducers, hydrophones 178
Uniaxial stresses
acoustic emission, conveyor belts . 182
Vibration systems
ultrasonic linear motors, travelling waves 39
Wave propagation
thermoviscoelastic solids, heterogeneous waves 308
Wave scattering
spherical voids, numerical models 116
Waveguides
ultrasound propagation, tissue biopsy 101
